

INCIDENT MANAGEMENT SITUATION REPORT  
 MONDAY, APRIL 29, 1996 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION: High winds continued to cause problems on nearly all the large fires yesterday. High to extreme fire dangers are being reported on numerous units in the Southwest, California and Colorado. Resource mobilization through NICC remained steady again on Sunday. The Type I Incident Management Team (Frye) from the Northern Rockies along with 10 additional crews will be transported to the Southwest Area today.

Southwest Area Large Fires:

LONE, Tonto NF. A Type II Incident Management Team (Whitney) is assigned. Erratic winds and low humidities continued to cause the fire to burn intensely. Dense Chaparral lies in the path of the fire. Plans are to continue a flanking attack today. Current threats are to a historic cabin, microwave sites and Bighorn Sheep habitat.

DOME, Santa Fe NF. A Type I Incident Management Team (Loving) is assigned. No new information was received on this fire.

CLARK PEAK, Coronado NF. A Type II Incident Management Team (Moore) is assigned. High winds continued to cause control problems yesterday. Suppression efforts will be concentrated on flashy fuels today. The fire is threatening multi-million dollar telescopes, an astro-physical research station, summer homes, a major USFS administrative site with a visitor information center and a research natural area.

SUGARITE, New Mexico State. No new information was received on this fire.

WHITE SPRINGS COMPLEX, Fort Apache Agency, BIA. A Type II Incident Management Team (Leech) is assigned. Both fires in the complex are now contained.

CHINO WELL, Mescalero Agency, BIA. A Type I Incident Management Team (Lente) is assigned. The fire was contained yesterday morning.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOST	EST LOSS	EST COST

CHINO WELL	MEA	NM	8,260	100	---	626	16	22	2	0	3.2M	4.6M

\* = No new information was received.

Rocky Mountain Area Large Fires:

SNOW SPRINGS, San Juan NF. A Type II Incident Management Team (Hart) is assigned. Control problems are steep terrain, snags, low fuel moistures and a lack of suitable natural barriers. The combination of control problems is forcing the need for difficult, indirect attack. A helitorch burnout is planned for Tuesday, following the completion of the indirect

attack line. This will significantly increase the fire size to approximately 1,500 acres.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRC LOST	EST LOSS	EST COST
SNOW SPRINGS	SJF	CO	355	50	5/3	79	3	4	1	0	UNK	UNK

Southern California Large Fires:

GRAND, Los Padres NF. The fire is burning north of Fillmore and is threatening the Sespe Condor Sanctuary and structures near the city of Fillmore. Heavy mobilization was in progress last night and this morning, including 5 strike teams of structure protection engines.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRC LOST	EST LOSS	EST COST

OUTLOOK: \*\*\*\*\* A RED FLAG WARNING IS POSTED FOR THE SOUTH CENTRAL COAST AREA OF CALIFORNIA DUE TO STRONG WINDS AND LOW RELATIVE HUMIDITIES \*\*\*\*\* Southern California, Arizona and New Mexico will continue to experience strong surface winds from a large surface high pressure system over the central Rockies. Skies will be mostly sunny except northeastern New Mexico which will be partly cloudy. High temperatures will range from the mid 50's to the mid 60's in the mountains to the lower 90's in the southern California and Arizona deserts. Southern California will have north to east winds at 30-45 MPH with gusts up to 70 MPH in the canyons and passes. Arizona will have north winds at 20-35 MPH, decreasing in the afternoon. New Mexico will have northwest to north winds at 10-20 MPH, mainly in the morning. Fire activity is expected to continue in the Southwest Area. The potential exists for increased fire activity in Southern California due to very high winds.

Check your chain saw chaps to see if there is a need for further inspection. Contact George Jackson at MTDC if you have any questions. You may reach George by calling (406) 329-3967 or faxing (406) 329-3719. His DG address is G.Jackson:R01A and the internet address is MTDCFIRE@MONTANA.COM.
